**REPORT OF THE BOARD OF DIRECTORS,  
INDEPENDENT AUDITOR'S REPORT AND  
CONSOLIDATED FINANCIAL STATEMENTS**

**31 DECEMBER 2024**

مجموعة ترافكو ش.م.ب  
Trafco Group B.S.C

*In the name of Allah, Most Gracious, Most Merciful.*

## **Report of the Board of Directors for 2024**

Despite some monthly increases in the prices of major food commodities during the major part of the year 2024, mainly caused by increase in the prices of dairy products, meat and vegetable oils, but, the General Index of the Food and Agriculture Organization of the United Nations (FAO) was published on average about 2% below the year 2023 price average. While the average prices of vegetable oils increased by 12% and dairy products by about 5%, the average prices of sugar in the world markets fell significantly by about 19% from the average prices in the previous year. On the other hand, rice prices globally have stabilized, while cereal prices have declined. International prices of skimmed milk powder and butter in the dairy industry recorded a sharp decline in the last quarter of the year due to weak global demand and stock accumulation against the high prices of whole milk powder.

The state of anxiety and instability in international shipping continued as a result of the ongoing wars in the Middle East, Ukrainian war and the continued diversion of international shipping lines from the Red Sea due to security concerns at the Bab Al-Mandab, which led to the interruption of the arrival of some goods from their sources to the Gulf, such as eggs from Ukraine and Turkey, and the delay in the arrival of shipments from Europe and Latin America, and the increase in shipping fees for containers, especially from the ports of India, has led to an increase in the cost of Indian sugar shipments arriving in the Gulf. On the other hand, the accumulation of containers at Jebel Ali Port has led to a lot of delays in the transshipment of a number of containers destined for Bahrain. One of the positive indicators for the past year is the gradual decline in the bank borrowing interest rate during the last quarter of the year, which, if it continues in the coming months, will inevitably have a direct impact on the cost of services in general.

**Trafco Group** managed to retain its total share in the food commodities market as a primary provider of frozen chicken, dairy products and meat, and the Group's total revenue for the financial year ended 31 December 2024, amounted to BD 46.8 million with an increase of 1.6% compared to the previous year, which was BD 46.1 million. While the total net profit for the fiscal year attributable to the Group's shareholders was BD 1.83 million compared to BD 1.75 million for the previous year, an increase of about 4.3%, and the total shareholders' equity decreased by 3.3% from BD 30.2 million to BD 29.2 million this year. The Group's total comprehensive profit dropped from BD 3 million to BD 264k, a decrease of about 91% as a result of fair value change mainly due to the unquoted investments. In compliance with International Financial Reporting Standards followed by the company, the realized profit from sale of portfolio of shares owned by the group attributable to Trafco group shareholders amounted to BD 103k were not included in the profit or loss account but were added directly to the total shareholders' equity.

#### **Awal Dairy Company W.L.L:**

The good performance of the sister company continued during the year, at the level of the local market and in some export countries, especially in the Kuwait market. The company achieved total sales of about BD 22.2 million, an increase from the previous year, which was about BD 21.3 million, an increase of 4.1% and it also offered new products in the markets. The company continued to obtain new commitments from many Gulf companies and international companies to pack a number of its products under their trade name. It is planned that there will be other products offered by the company before the next Ramadan season in the local market and through its branches in Kuwait and Saudi Arabia.

In terms of the company's production capacities, the executive management is rearranging the current site to provide additional spaces to accommodate new production lines that are expected to be installed during the new year. It is also for the first time owned by purchase a piece of land with warehouses ready to use around 4000 Square meters in Samajeej – Galali area, this will increase its storage capacity for raw materials so that it can meet the growing demand for its products and reduce the cost and dependence on storage with other parties. The financial situation of the company in general is excellent and the management continues to implement its investment plans to expand its facilities and production lines.

### **Mawashi Trading Company W.L.L:**

The fiscal year 2024 was not a good year for the 100% owned livestock company as a result of the sharp decline in sales volume in the live sheep and meat sector due to intense competition and low profit margin, while sales increased in the catering department for hotels and restaurants. The company's results were negative this year, as it recorded losses of about BD 99k that were included in the consolidated financials. Corrective measures have been taken for the executive management and the company's activity in general. The company continues to operate as one of the providers of fresh, chilled and frozen meat and other food commodities in the local market, and its central slaughterhouse in Sitra is operating normally despite the decline in demand for live sheep other than at the time of occasions and holidays. It is hoped that the performance of the company will improve, and its results will be positive in the coming period with the changes taken to reconsider the management and their performance. During the year, the company's trade name was changed from Bahrain Livestock Company WLL to Mawashi Trading Company WLL to be in line with the company's new directions and business diversification.

### **Trafco Logistics Company W.L.L:**

The subsidiary continues its business as a storage services provider and records a good performance during the fiscal year and achieves a net profit from its operations of about BD 109k, a decrease of 13.24% from last year's profits as a result of intense competition and the increase in the cost of services provided. By the end of the fiscal year, the construction and expansion of the new warehouses at the company's current site have been completed at a cost of about BD 3 million, including equipment, and this investment is expected to add additional space for storing refrigerated, frozen and dry goods to provide services to third parties and subsidiaries of the Group. This expansion will begin to put in operation during January of the New Year.

### **Bahrain Water Bottling & Beverages Company W.L.L:**

With more than 15 water bottling manufacturing and marketing companies in Bahrain, the demand for bottled water is increasing, especially from mosque and charities services. The company's total sales of water and other materials amounted to BD 1.96 million, an increase of about 12.4% over the previous year's total sales of BD 1.74 million, and achieved a net profit of BD 161k for the fiscal year , compared to BD 41k in the previous year with an increase of 296%. The company was able to export bottled water to foreign markets and the volume of sales for large 5 gallon bottles increased after a new marketing & distribution policy was implemented to reach all sectors. The company plans to invest in new equipment for the production and packaging of new different size of water bottles and expects better results in the coming years.

### **Bahrain Fresh Fruits Company W.L.L:**

The company recorded losses in the fiscal year amounting to about BD 57k and total sales of about BD 1.8 million, however these figures were lower than the previous year, as the losses in 2023 were about BD 72k and sales BD 2.1 million. The management of the company was restructured and the former Operations Manager was dispensed. The executive management plans a radical change in the business of this company and expects to expand into new areas and achieve profits in the coming period.

### **Matters related to governance and social responsibility:**

The group complies with all the requirements of governance, and there are specialized committees from the Board of Directors and Executive Management that follow up on these matters periodically and take the necessary measures to implement any instructions or observations made by the supervisory or financial control authorities and the internal or external auditor. The attached financial report details the group's commitment to the requirements of governance and information about the members of the Board of Directors, Management and their activity and participation in the group's committees or companies. The Board of Directors would also like to inform shareholders that some of the members of the Board of Directors, in their personal capacity, have an interest or have stakes in companies that have been engaged, for a long time, in similar business to some or all the goods and activities of the Group and its subsidiaries. At the same time, the Board of Directors confirms that all transactions with all related parties, including members of the board of directors or companies in which they have an interest, are carried out in full transparency and on a purely commercial basis. The volume of transactions with related parties during the year is included in the financial statements for review.

In compliance with the requirements of the Commercial Companies Law and in implementation of the instructions of the supervisory authorities, the detailed table below shows the remuneration and attendance fees to each member of the Board of Directors received during the year and second table shows the total salaries and bonuses disbursed to the top six Executives during the year 2024.

**Executive management remuneration details**

(Amounts in BD)

Executive Management	Total paid salaries and allowances	Total paid remuneration (Bonus)	Any other cash/ in kind remuneration for 2024	Aggregate Amount
Top 6 remunerations for executives, including CEO and Senior Financial Officer.	211,900	19,324	11,468	242,692

As part of its social responsibility, the group contributed to the campaign of National Afforestation Program (Forever Green) as part of the national initiative for the agricultural sector.

As like every year, the group contributed and participated in financial support for many charitable societies and social service institutions in the Kingdom of Bahrain.

**Net profit and recommendation on how to distribute it:**

The net profit attributable to shareholders of Trafco Group for the financial year ended 31 December 2024 as per the Ernst & Young audited financials was BD 1,827,333.

The Board of Directors recommends the distribution of these profits as follows subject to the approval of the annual general meeting:

- General Reserve BD 50,000
- Cash dividends to shareholders at 18% BD 1,335,413
- Allocation to Donations & Charity (to be adjusted next year) BD 60,000

The Directors' remuneration of BD 119,925 for the year 2024 (2023: BD 119,925) (subject to the approval of the annual general meeting) was already provided from the above net profit.

Further, it is worth noting, that the Group has achieved profits on the sale of investment of BD 103k which was not included in the statement of profit or loss but was included in shareholders' equity through other comprehensive income in compliance with IFRS requirements.

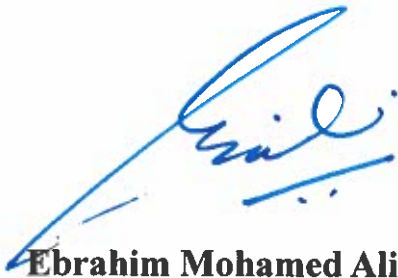

### **Acknowledgments:**

In conclusion, we extend our sincere thanks, appreciation and gratitude to all government agencies that cooperated with us to facilitate manufacturing, import and storage in general, which enabled the group to provide its services in providing basic food commodities to citizens and residents in the Kingdom of Bahrain. We also thank and appreciate the cooperation of all dealers with the group companies and their commitment to distribution agreements and marketing offers, which facilitated the access of our products to the segments of society and in the different regions of the Kingdom of Bahrain.

We also appreciate with gratitude the efforts of all members of the executive management and employees of the group companies for their sincerity in work and their keenness to provide the best services to the masses of our customers.

## **INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF TRAFCO GROUP B.S.C.**

### **Report on the Audit of the Consolidated Financial Statements**

#### *Opinion*

We have audited the consolidated financial statements of Trafco Group B.S.C. (“the Company”) and its subsidiaries (together “the Group”), which comprise the the consolidated statement of financial position as at 31 December 2024, and the consolidated statement of profit or loss and other comprehensive income, consolidated statement of cash flows and consolidated statement of changes in equity for the year then ended, and notes to the consolidated financial statements, including material accounting policy information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31 December 2024, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with IFRS Accounting standards as issued by International Accounting Standards Board (IASB).

#### *Basis for opinion*

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor’s responsibilities for the audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants’ *International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code)* together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Kingdom of Bahrain, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### *Key audit matters*

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements for the year ended 31 December 2024. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor’s responsibilities for the audit of the consolidated financial statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

**INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF  
TRAFICO GROUP B.S.C. (continued)**

**Report on the Audit of the Consolidated Financial Statements (continued)**

*Key audit matter (continued)*

<b>Valuation of unquoted equity investments</b>	
Refer to notes 3 and 11 to the consolidated financial statements.	
<b>Key audit matter</b>	<b>How our audit addressed the key audit matter</b>
<p>The Group holds unquoted equity investments of BD 5,116,894 as at 31 December 2024, which accounts for 9% of the Group's total assets. These investments are measured at fair values determined based on unobservable inputs using market multiples or other appropriate valuation methodologies.</p> <p>Due to the illiquid nature of these investments, the determination of fair value is subjective and involves use of estimates, assumptions and judgments. The exit value of unquoted equity investments will be determined by the market at the time of realisation and therefore despite the valuation policy and judgments applied by management, the final exit value may materially differ from the fair value determined at the reporting date.</p> <p>Given the inherent subjectivity surrounding the valuation of unquoted equity investments, we determined this to be a key audit matter for our audit.</p>	<p>Our audit procedures in this area included, among others:</p> <ul style="list-style-type: none"> <li>(i) We evaluated the independent external valuation expert's competence, experience, capabilities and objectivity by inspecting the terms of their engagement letter and evaluating the valuation report;</li> <li>(ii) We assessed the appropriateness of the valuation methodologies used by the independent external valuation expert;</li> <li>(iii) We corroborated the key inputs used in the valuation with independently available information;</li> <li>(iv) We evaluated the appropriateness of illiquidity and other discounts applied on the valuation, against online published data and empirical studies to assess their appropriateness and reasonableness.</li> <li>(v) We tested the arithmetical accuracy of the calculation used in the valuation; and</li> <li>(vi) Engaging our internal specialist to assess the reasonableness of the methodology used by management expert.</li> <li>(vii) We evaluated the adequacy of disclosures in the consolidated financial statements.</li> </ul>

*Other information included in the Group's 2024 annual report*

Other information consists of the information included in the Group's 2024 Annual Report, other than the consolidated financial statements and our auditor's report thereon. The Board of Directors is responsible for the other information. Prior to the date of this auditors' report, we obtained the Report of the Board of Directors which form part of the annual report, and the remaining sections of the annual report are expected to be made available to us after that date.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

## **INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF TRAFCO GROUP B.S.C. (continued)**

### **Report on the Audit of Consolidated Financial Statements (continued)**

#### *Other information included in the Group's 2024 annual report (continued)*

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information obtained prior to the date of the auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### *Responsibilities of the Board of Directors for the consolidated financial statements*

The Board of Directors is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS Accounting Standards, and for such internal control as the Board of Directors determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Board of Directors is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Group's financial reporting process.

#### *Auditor's responsibilities for the audit of the consolidated financial statements*

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

## **INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF TRAFICO GROUP B.S.C. (continued)**

### **Report on the Audit of the Consolidated Financial Statements (continued)**

#### *Auditor's responsibilities for the audit of the consolidated financial statements (continued)*

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Company's Board of Directors.
  
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
  
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
  
- Plan and perform the Group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for the purpose of Group audit. We remain solely responsible for our audit opinion.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Board of Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Board of Directors, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## **INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF TRAFCO GROUP B.S.C. (continued)**

### **Report on Other Legal and Regulatory Requirements**

We report that:

- a) as required by the Bahrain Commercial Companies Law:
  - i) the Company has maintained proper accounting records and the consolidated financial statements are in agreement therewith;
  - ii) the financial information contained in the Report of the Board of Directors is consistent with the consolidated financial statements; and
  - iii) satisfactory explanations and information have been provided to us by management in response to all our requests.
  
- b) we are not aware of any violations of the Bahrain Commercial Companies Law, the Central Bank of Bahrain (CBB) Rule Book (applicable provisions of Volume 6) and CBB directives, regulations and associated resolutions, rules and procedures of the Bahrain Bourse or the terms of the Company's memorandum and articles of association during the year ended 31 December 2024 that might have had a material adverse effect on the business of the Group or on its consolidated financial position.
  
- c) As required by Article 8 of section 2 of Chapter 1 of the Bahrain Corporate Governance Code, we report that the Company:
  - i) has appointed a Corporate Governance Officer; and
  - ii) has a board approved written guidance and procedures for corporate governance.

The Partner in charge of the audit resulting in this independent auditor's report is Abdullatif Al Mahmood.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2024

**1 CORPORATE INFORMATION**

Trafco Group B.S.C. ('the Company' or 'Trafco' or 'the parent company') is a public joint stock company, the shares of which are listed and publicly traded on Bahrain Bourse. The Company was incorporated in the Kingdom of Bahrain by Amiri Decree No. 10 of November 1977. The Company operates in accordance with the provisions of the Bahrain Commercial Companies Law under commercial registration (CR) number 8500 issued by the Ministry of Industry and Commerce. The postal address of the Company's registered office is PO Box 20202, Manama, Kingdom of Bahrain. The Company's principal activity is trading in food products.

The consolidated financial statements were authorised for issue in accordance with a resolution of the Board of Directors on 26 February 2025. The Group comprises of the Company and its following subsidiaries and associates:

<i>Relationship / name</i>	<i>Country of incorporation</i>	<i>Ownership interest</i>		<i>Principal activities</i>
		<i>2024</i>	<i>2023</i>	
<b>Subsidiaries</b>				
Bahrain Water Bottling & Beverages Company W.L.L.	Kingdom of Bahrain	<b>100%</b>	100%	Producing, bottling and marketing of sweet drinking water and beverages.
Bahrain Fresh Fruits Company W.L.L.	Kingdom of Bahrain	<b>100%</b>	100%	Trading in fresh fruits, vegetables and other food products.
Trafco Logistics Company W.L.L.	Kingdom of Bahrain	<b>100%</b>	100%	Providing storage and logistics services.
Awal Dairy Company W.L.L.	Kingdom of Bahrain	<b>51%</b>	51%	Production and supply of milk, juices, ice cream and tomato paste.
Mawashi Trading Company W.L.L. (Formerly Bahrain Livestock Company W.L.L.)	Kingdom of Bahrain	<b>100%</b>	100%	Import of both livestock and chilled meat.
Kuwait Bahrain Dairy Company W.L.L.*	State of Kuwait	<b>50%*</b>	50%*	Marketing and supply of milk, juices and associated products.
<b>Associates</b>				
Qatari Bahraini Food Trading Co. L.L.C.	State of Qatar	<b>50%</b>	50%	Under liquidation.

\* Effective ownership. Owned by Awal Dairy Company W.L.L.

Except for Awal Dairy Company W.L.L. and its subsidiary Kuwait Bahrain Dairy Company W.L.L. which have 30 September financial year-ends, the financial year-end of all the remaining subsidiaries are 31 December.

The Group operates in the Kingdom of Bahrain, State of Kuwait and Kingdom of Saudi Arabia.

## 2 MATERIAL ACCOUNTING POLICIES

### Basis of preparation

The consolidated financial statements are prepared under the historical cost convention, except for investments at fair value through other comprehensive income that have been measured at fair value.

The consolidated financial statements have been presented in Bahraini Dinars (BD) which is the functional currency of the Company and the presentation currency of the Group.

### Statement of compliance

The consolidated financial statements of the Group have been prepared in accordance with International Financial Reporting Standards ("IFRS Accounting standards"), as issued by the International Accounting Standards Board ("IASB"), and in conformity with the Bahrain Commercial Companies Law, the Central Bank of Bahrain (CBB) Rule Book (applicable provisions of Volume 6) and CBB directives, regulations and associated resolutions, rules and procedures of the Bahrain Bourse.

### Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries as at 31 December 2024. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- exposure, or rights, to variable returns from its involvement with the investee; and
- the ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- the contractual arrangement with the other vote holders of the investee;
- rights arising from other contractual arrangements; and
- the Group's voting rights and potential voting rights.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group obtains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the shareholders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses, cash flows and unrealised gains or losses relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, non-controlling interest and other components of equity while any resultant gain or loss is recognised in profit or loss. Any investment retained is recognised at fair value.

## 2 MATERIAL ACCOUNTING POLICIES (continued)

### New and amended standards and interpretations

The accounting policies adopted in the preparation of these consolidated financial statements are consistent with those used in the previous year, except for certain amendments to standards adopted by the Group as of 1 January 2024. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective. The adoption of these standards and interpretations did not have any effect on the Group's financial position, financial performance or disclosures.

- *Amendments to IAS 1: Classification of Liabilities as Current or Non-current: In January 2020, the IASB issued amendments to IAS 1 to specify the requirements for classifying liabilities as current or non-current;*
- *Amendments to IAS 7 and IFRS 7 – Disclosures - Supplier Finance Arrangements: In May 2023, the IASB issued these amendments to clarify the characteristics of supplier finance arrangements and require additional disclosure of such arrangements. The disclosure requirements in the amendments are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk; and*
- *Amendments to IFRS 16 – Lease Liability in a Sale and Leaseback: In September 2022, the IASB issued amendments to IFRS 16 to specifies the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction, to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains.*

The adoption of these standards and amendments did not have any effect on the Group's consolidated financial statements.

### Domestic minimum top-up tax

The OECD Global Anti-Base Erosion Pillar Two Model Rules ('GloBE rules') apply to multinational enterprise (MNE) groups with total annual consolidated revenue exceeding EUR 750 million in at least two of the four preceding fiscal years.

In line with the requirements of GloBE rules, the Kingdom of Bahrain has issued and enacted Decree Law No. (11) of 2024 ('Bahrain DMTT law') on 1 September 2024 introducing a domestic minimum top-up tax ("DMTT") of up to 15% on the taxable income of the Bahrain resident entities of the Group for fiscal years commencing on or after 1 January 2025.

As per the Group's preliminary assessment, it has concluded that it is not in scope for the Bahrain DMTT law or the GloBE rules as it does not have total annual consolidated revenue exceeding EUR 750 million in at least two of the four preceding fiscal years.

Accordingly, it does not expect to be subject to the Bahrain DMTT law and GloBE rules for the next fiscal year.

### Foreign currency transactions

The Group's consolidated financial statements are presented in Bahraini Dinars (BD) which is also the Company's functional currency. For each entity, the Group determines the functional currency and items included in the financial statements of each entity are measured using that functional currency. The Group uses the direct method of consolidation and has elected to recycle to profit or loss the gain or loss that arises from using this method.

**2 MATERIAL ACCOUNTING POLICIES (continued)**

**Foreign currency transactions (continued)**

*Transactions and balances*

Transactions in foreign currencies are initially recorded at their respective functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency spot rate of exchange at the reporting date.

All differences arising on settlement or translation of monetary items are taken to the profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on retranslation of non-monetary items is treated in line with the recognition of gain or loss on change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in other comprehensive income or profit or loss is also recognised in other comprehensive income or profit or loss, respectively).

*Group companies*

On consolidation, the assets and liabilities of foreign operations are translated into BD at the rate of exchange prevailing at the reporting date and their statements of income are translated at the weighted average exchange rates for the year. The exchange differences arising on the translation for consolidation are recognised in other comprehensive income. On disposal of a foreign operation, the component recognised in the consolidated statement of changes in equity relating to that particular foreign operation is recognised in profit or loss.

**Revenue recognition**

**Revenue from contract with customers**

The Group is in the business of production, marketing and trading in food products and beverages and providing storage and logistics services. Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group has generally concluded that it is the principal in its revenue arrangements because it typically controls the goods or services before transferring them to the customer.

The recognition criteria for various types of revenue are as follows:

*Sale of goods*

Revenue from sale of goods is recognised at the point in time when control is transferred to the customer, generally on delivery of the goods.

The Group considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of goods, the Group considers the effects of variable consideration, the existence of significant financing components, non-cash consideration and consideration payable to the customer (if any). Presently only variable consideration has an effect on the Group's revenue recognition.

*Sale of services*

The Group recognises revenue from services over time when the services are rendered because the customer simultaneously receives and consumes the benefits provided by the Group.

## 2 MATERIAL ACCOUNTING POLICIES (continued)

### Variable consideration

If the consideration in a contract includes a variable amount, the Group estimates the amount of consideration to which it will be entitled in exchange for transferring the goods to the customers. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved. Some contracts for the sale of goods provide customers with a right of return, volume rebates and display fees. The rights of return, volume rebates and display fees give rise to variable consideration.

- *Right of return*

Certain contracts provide a customer with a right to return the goods within a specified period. The Group uses the expected value method to estimate the goods that will not be returned because this method best predicts the amount of variable consideration to which the Group will be entitled. The requirements in IFRS 15 on constraining estimates of variable consideration are also applied in order to determine the amount of variable consideration that can be included in the transaction price. For goods that are expected to be returned, instead of revenue, the Group recognises a refund liability. A right of return asset (and corresponding adjustment to cost of sales) is also recognised for the right to recover products from a customer.

- *Volume rebates*

The Group provides retrospective volume rebates to certain customers once the quantity of products purchased during the period exceeds a threshold specified in the contract. Rebates are offset against amounts payable by the customers. To estimate the variable consideration for the expected future rebates, the Group applies the most likely amount method for contracts with a single-volume threshold and the expected value method for contracts with more than one volume threshold. The selected method that best predicts the amount of variable consideration is primarily driven by the number of volume thresholds contained in the contract. The Group then applies the requirements on constraining estimates of variable consideration and recognises a contract liability for the expected future rebates.

- *Display fees*

The Group pays display fees to its customers for renting of shelf for displaying its products. Display fees are offset against amounts payable by the customer. Display fees give rise to variable consideration which the Group applies by reducing the revenue.

### Contract balances

#### *Trade receivables*

A receivable represents the Group's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies relating to financial assets later in this note for further details.

#### *Contract liabilities*

A contract liability is the obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Group transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Group performs under the contract.

#### *Right of return assets*

Right of return asset represents the Group's right to recover the goods expected to be returned by customers. The asset is measured at the former carrying amount of the inventory, less any expected costs to recover the goods, including any potential decreases in the value of the returned goods. The Group updates the measurement of the asset recorded for any revisions to its expected level of returns, as well as any additional decreases in the value of the returned products.

## 2 MATERIAL ACCOUNTING POLICIES (continued)

### Contract balances (continued)

#### *Refund liabilities*

A refund liability is the obligation to refund some or all of the consideration received (or receivable) from the customer and is measured at the amount the Group ultimately expects it will have to return to the customer. The Group updates its estimates of refund liabilities (and the corresponding change in the transaction price) at the end of each reporting period. Refer to the accounting policy on variable consideration earlier in this note.

### Government grant

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognised as income in equal amounts over the expected useful life of the related asset.

When the Group receives grants of non-monetary assets, the asset and the grant are recorded at nominal amounts and released to profit or loss over the expected useful life of the asset, based on the pattern of consumption of the benefits of the underlying asset by equal instalments.

### Other income recognition

#### *Interest income*

Interest income is recorded using the effective interest rate (EIR) method, which is the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or liability.

#### *Dividend income*

Revenue is recognised when the Group's right to receive the payment is established, which is generally when shareholders of the investee approve the dividend.

#### *Other revenue*

Other revenue is recognised on an accrual basis when income is earned.

### Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective asset. All other borrowing costs are expensed in the period when they are incurred. Borrowing costs consist of interest and other costs that the Group incurs in connection with the borrowing of funds.

### Property, plant and equipment

Property, plant and equipment is stated at cost, net of accumulated depreciation and impairment in value, if any. Such cost includes the cost of replacing a part of the property, plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of property, plant and equipment are required to be replaced at intervals, the Group recognises such parts as individual assets with specific useful lives and depreciates them accordingly. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the property, plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss when incurred.

**2 MATERIAL ACCOUNTING POLICIES (continued)**

**Property, plant and equipment (continued)**

*Capital work-in-progress*

The capital work-in-progress is stated at cost less any identified impairment loss and comprises expenditure incurred on the acquisition and installation of property, plant and equipment which is transferred to the appropriate category of asset and depreciated as and when assets are available for use. These include assets that are periodically refurbished.

*Subsequent expenditure*

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Group. If subsequent expenditure is related to a previously capitalised project, it is depreciated over the remaining useful life.

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets, except for freehold land and capital work-in-progress, as follows:

- |   |  |
|---|--|
| - Buildings on leasehold land               | lesser of 10 to 30 years or lease term |
| - Plant, machinery and cold store equipment | over 2 to 15 years                     |
| - Furniture, fixtures and office equipment  | over 2 to 5 years                      |
| - Motor vehicles                            | over 4 to 12 years                     |

The carrying values of property, plant and equipment are reviewed for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. If any such indication exists and where the carrying values exceed the estimated recoverable amount, the assets are written down to their recoverable amount, being the higher of their fair value less costs of disposal and their value in use.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is recognised in profit or loss in the year the asset is derecognised.

The assets' residual values, useful lives and methods of depreciation are reviewed at each financial year-end and adjusted prospectively if appropriate.

**Inventories**

Inventories are stated at the lower of cost and net realisable value after making due provision for any obsolete or slow moving items. Costs are those expenses incurred in bringing each product to its present location and condition, and are accounted for as follows:

- |  |  |
|--|--|
| Raw materials, consumables,<br>spare parts and other items | - landed costs on a weighted average basis.  |
| Finished goods   | - costs of direct materials and labour and proportion of manufacturing overheads based on normal operating capacity. |
| Goods for sale   | - landed costs on a first-in, first-out basis.   |
| Right of return asset                                      | - Original cost less estimated cost necessary to make sale.  |

Net realisable value is based on estimated selling price in the ordinary course of business less estimated costs of completion and the estimated costs necessary to make the sale.

**Leases - Group as a lessee**

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

**2 MATERIAL ACCOUNTING POLICIES (continued)****Leases - Group as a lessee (continued)***i) Right-of-use assets*

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the underlying assets, as follows:

- Land	30 years
- Buildings	3 to 5 years
- Motor vehicles	3 to 5 years

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The Group's lease arrangements do not contain an obligation to dismantle and remove the underlying asset, restore the site on which it is located or restore the underlying asset to a specified condition.

*ii) Lease liabilities*

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate.

Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the recognition of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

**Impairment of non-financial assets**

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets.

## 2 MATERIAL ACCOUNTING POLICIES (continued)

### Impairment of non-financial assets (continued)

When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices or other available fair value indicators.

An assessment is made at each reporting date whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in profit or loss.

### Investment in an associate

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

The considerations made in determining significant influence are similar to those necessary to determine control over subsidiaries. The Group's investment in an associate is accounted for using the equity method.

Under the equity method, the investment in an associate is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate since the acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment and is neither amortised nor individually tested for impairment.

Group's share of the results of operations of the associate is included in profit or loss outside operating profit and represents results after tax and non-controlling interests in the subsidiaries of the associate. Any change in other comprehensive income of the associate is presented as part of the Group's other comprehensive income. In addition, when there has been a change recognised directly in the equity of the associate, the Group recognises its share of any changes, when applicable, in the consolidated statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the Group's investment in the associate.

The financial statements of the associate is prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its associate. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of its investment in associate and its carrying value, then recognises the loss as 'Share of results of associate' in profit or loss.

Upon loss of significant influence over the associate, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

## 2 MATERIAL ACCOUNTING POLICIES (continued)

### Current versus non-current classification

The Group presents assets and liabilities in the consolidated statement of financial position based on a current/non-current classification.

An asset is classified as current when it is:

- expected to be realised or intended to be sold or consumed in the normal operating cycle;
- held primarily for the purpose of trading;
- expected to be realised within twelve months after the reporting period; or
- cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is classified as current when:

- it is expected to be settled in the normal operating cycle;
- it is held primarily for the purpose of trading;
- it is due to be settled within twelve months after the reporting period; or
- there is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

### Financial instruments - recognition and measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### Financial assets

##### *Initial recognition and measurement*

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (FVOCI) or fair value through profit or loss (FVTPL). Except for equity instruments, the classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under IFRS 15.

In order for a financial asset to be classified and measured at amortised cost or fair value through other comprehensive income, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

The group's financial assets include investments at fair value through other comprehensive income, trade and other receivables, bank balances and short term deposits.

## 2 MATERIAL ACCOUNTING POLICIES (continued)

### Financial instruments - recognition and measurement (continued)

#### Financial assets (continued)

##### *Subsequent measurement*

For purposes of subsequent measurement, financial assets are classified in following categories:

- Financial assets at amortised cost (debt instruments);
- Financial assets at fair value through other comprehensive income with recycling of cumulative gains and losses (debt instruments); and
- Financial assets designated at fair value through other comprehensive income with no recycling of cumulative gains and losses upon derecognition (equity instruments).

##### *Financial assets at amortised cost (debt instruments)*

This category is the most relevant to the Group. The Group measures financial assets at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

##### *Financial assets designated at fair value through other comprehensive income (FVOCI)*

###### *Equity instruments*

Equity investments classified at FVOCI are subsequently measured at fair value with changes in fair value recognised in other comprehensive income. Such cumulative gains or losses recognised in "fair value reserve" within the statement of changes in equity are never reclassified to profit or loss on disposals. Dividends are recognised as investment income in profit or loss when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in other comprehensive income. Equity investments classified at FVOCI are not tested for impairment.

The Group elected to classify irrevocably its equity investments under this category.

### Derecognition of financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- the rights to receive cash flows from the asset have expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either
  - (a) the Group has transferred substantially all the risks and rewards of the asset, or
  - (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

## 2 MATERIAL ACCOUNTING POLICIES (continued)

### Financial instruments - recognition and measurement (continued)

#### Derecognition of financial assets (continued)

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

#### Impairment of financial assets

The Group recognises an allowance for expected credit losses (ECLs) for all debt instruments. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

For trade receivables which is the only significant financial asset exposed to credit risk, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for any relevant forward-looking factors.

The Group considers a financial asset in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

### Financial liabilities

#### *Initial recognition and measurement*

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss or financial liabilities at amortised cost as appropriate. All financial liabilities are recognised initially at fair value and, in the case financial liabilities at amortised cost, net of directly attributable transaction costs. The Group's financial liabilities mainly include trade and other payables, term loans, import loans, lease liabilities and bank overdrafts.

#### *Subsequent measurement*

All financial liabilities of the Group are subsequently measured at amortized cost. Such liabilities are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the profit or loss.

#### Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled, or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in profit or loss.

## 2 MATERIAL ACCOUNTING POLICIES (continued)

### Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

### Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the asset or liability, or
- in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; and
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

### Treasury shares

Own equity instruments which are reacquired (treasury shares) are recognised at cost and deducted from equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of own equity instruments. Voting rights related to treasury shares are nullified for the Company and no dividends are allocated to them.

### Cash and cash equivalents

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash in hand, short term deposits and bank balances, net of outstanding bank overdrafts.

## 2 MATERIAL ACCOUNTING POLICIES (continued)

### Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in profit or loss, net of any reimbursement.

### Employees' end of service benefits

For Bahraini nationals, the Group makes contributions to the Social Insurance Organisation (SIO). This is a funded defined contribution scheme and the Group's contributions are charged to the consolidated statement of profit or loss in the year to which they relate. The Group's obligations are limited to the amounts contributed to the Scheme.

The Group also provides for end of service benefits for its expatriate employees. The entitlement to these benefits is based upon the employee's final salary and length of service. The expected costs of these benefits are accrued over the period of employment. Under a new end of service benefits system for non-Bahraini employees, effective from 1 March 2024, the Group's required to pay the monthly end of service contributions electronically through the Social Insurance Organization (SIO) portal calculated as a percentage of the employees' salaries. Benefits accrued before 1 March 2024 will remain recorded in the Group's consolidated financial statements and will be paid to the employee as or when the employee leaves the Group.

Further, adequate provision is created for staff entitlements in accordance with the labour laws prevailing in the respective countries in which the subsidiaries operate.

### Business combinations and goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, which is measured at acquisition date fair value, and the amount of any non-controlling interests in the acquiree plus, if the business combination is achieved in stages, the fair value of the existing equity interest in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred and included in profit or loss.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests and any previous interest held over the net identifiable assets acquired and liabilities assumed). If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in profit or loss. After initial recognition, goodwill is measured at cost less any accumulated impairment losses.

### 3 MATERIAL ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the Group's consolidated financial statements requires the Board of Directors to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities and the disclosure of contingent liabilities, at the reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the assets or liabilities affected in future periods.

#### Judgements

In the process of applying the Group's material accounting policies, the Board of Directors has made the following judgements, which have the most significant effect on the amounts recognised in the consolidated financial statements:

##### *Going concern*

The Company's Board of Directors has made an assessment of the Group's ability to continue as a going concern and is satisfied that the Group has the resources to continue the business for the foreseeable future. Furthermore, the Board of Directors is not aware of any material uncertainties that may cast a significant doubt about the Group's ability to continue as a going concern. Therefore, the consolidated financial statements continue to be prepared on a going concern basis.

##### *Classification of investments*

The Group's management determines the classification of investments on initial recognition as "financial asset at fair value through profit or loss" or "financial asset at fair value through other comprehensive income". The investments are classified as "financial asset at fair value through profit or loss" if they are acquired for the purpose of selling in the near term. All other investments are classified as "financial asset at fair value through other comprehensive income".

##### *Determining the lease term of contracts with renewal and termination options*

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Group has several lease contracts that include extension and termination options. The Group applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate (e.g., construction of significant leasehold improvements or significant customisation to the leased asset).

The Group included the renewal period as part of the lease term for leases with shorter non-cancellable period (i.e., three to five years). The Group typically exercises its option to renew for these leases because there will be a significant negative effect on operations if a replacement asset is not readily available. The renewal periods for leases with longer non-cancellable periods (i.e., 10 to 15 years) are not included as part of the lease term as these are not reasonably certain to be exercised. In addition, the renewal options for leases of motor vehicles are not included as part of the lease term because the Group typically leases motor vehicles for not more than five years and, hence, is not exercising any renewal options. Furthermore, the periods covered by termination options are included as part of the lease term only when they are reasonably certain not to be exercised.

**3 MATERIAL ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (continued)**

**Judgements (continued)**

*Revenue from contracts with customers*

The Group applied judgements that significantly affect the determination of the amount and timing of revenue from contracts with customers. The Group has concluded that revenue from sale of goods is to be recognised at the point in time when control of goods is transferred to the customer and revenue from services is to be recognised over time because the customers simultaneously receive and consume the benefits provided by the Group.

**Estimates and assumptions**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Group based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising beyond the control of the Group.

*Valuation of unquoted investments at fair value through other comprehensive income*

Management uses its best judgement in determining fair values of the unquoted private equity investments by reference to using fair value provided by the investment managers or other appropriate valuation techniques including fair values determined based on unobservable inputs using a market multiples or other appropriate valuation methodologies. Management uses its best judgement, however, the actual amount realised in a future transaction may differ from the current estimate of fair value given the inherent uncertainty surrounding the valuation of unquoted equity investments.

*Provision for slow moving and obsolete inventories*

Inventories are held at the lower of cost and net realisable value. When inventories become old or obsolete, an estimate is made of their net realisable value. For individually significant amounts this estimation is performed on an individual basis. Amounts which are not individually significant, but which are old or obsolete, are assessed collectively and a provision applied according to the inventory type and the degree of ageing or obsolescence, based on historical selling prices and next year budget.

At the reporting date, gross inventories amounted to BD 12,530,389 (2023: BD 11,669,555), with a provision for slow moving and obsolete inventories of BD 650,089 (2023: BD 639,439). Any difference between the amounts actually realised in future periods and the amounts expected will be recognised in profit or loss.

*Impairment of property, plant and equipment and right-of-use of assets*

The Group assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group makes an estimate of the asset's recoverable amount. An asset's recoverable amount is higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessment of the time value of money and the risks specific to the assets. The Board of Directors do not believe that there is any impairment of property, plant and equipment and right-of-use of assets as at 31 December 2024 and 31 December 2023.

**3 MATERIAL ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (continued)**

**Estimates and assumptions (continued)**

*Useful lives of property, plant and equipment*

The Group's management determines the estimated useful lives of its property, plant and equipment for calculating depreciation. This estimate is determined after considering the expected usage of the asset or physical wear and tear. Management reviews the residual values and useful lives annually and future depreciation charges would be adjusted where management believes the useful lives differ from previous estimates.

*Allowance for expected credit losses*

The determination of 'allowance of expected credit losses' as discussed in note 2 involves estimates and assumptions.

The provision matrix is initially based on the Group's historical observed default rates. The Group will calibrate the matrix to adjust the historical credit loss experience with the forward-looking information. For instance, if forecast economic conditions (i.e. inflation rate) are expected to deteriorate over the next year which can lead to an increased number of defaults in the consumer sector, the historical default rates are adjusted. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future.

At the reporting date, gross trade receivables (including related party receivables) were BD 12,020,058 (2023: BD 10,591,886), with an allowance for expected credit loss of BD 1,727,246 (2023: BD 1,512,916). Any difference between the amounts actually collected in future periods and the amounts expected will be recognised in profit or loss.

*Estimating variable consideration for returns and volume rebates*

The Group estimates variable considerations to be included in the transaction price for the sale of good with rights of return and volume rebates.

The Group used the historical return data of each product to come up with expected return percentages. These percentages are applied to determine the expected value of the variable consideration. Any significant changes in experience as compared to historical return pattern will impact the expected return percentages estimated by the Group.

The Group's expected volume rebates are analysed on a per customer basis for contracts that are subject to a single volume threshold. Determining whether a customer will be likely entitled to rebate will depend on the customer's historical rebates entitlement and accumulated purchases to date.

For volume rebates for contract with more than one volume threshold, the Group uses the historical purchasing patterns and rebates entitlement of customers to determine the expected rebate percentages and the expected value of the variable consideration. Any significant changes in experience as compared to historical purchasing patterns and rebate entitlements of customers will impact the expected rebate percentages estimated by the Group.

### 3 MATERIAL ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (continued)

#### Estimates and assumptions (continued)

##### *Estimating variable consideration for returns and volume rebates (continued)*

The Group updates its assessment of expected returns and volume rebates on a quarterly basis and the refund liabilities are adjusted accordingly. Estimates of expected returns and volume rebates are sensitive to changes in circumstances and the Group's past experience regarding returns and rebate entitlements may not be representative of customers' actual returns and rebate entitlements in the future. As at 31 December 2024, the amount recognised as refund liabilities for the expected returns and contract liability for volume rebates was BD 59,512 (2023: BD 59,936) and BD 432,182 (2023: BD 312,402) respectively. Revenue recognised during the year ended 31 December 2024 that was included in the contract liabilities at beginning of the year amounted to BD 372,338 (2023: BD 295,986). The Group expects to recognise revenue related to the contract liabilities between 1 to 3 months from the reporting date (2023: between 1 to 3 months).

##### *Incremental borrowing rate for leases*

The Group cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR, therefore, reflects what the Group 'would have to pay', which requires estimation when no observable rates are available (such as for subsidiaries that do not enter into financing transactions) or when they need to be adjusted to reflect the terms and conditions of the lease (for example, when leases are not in an entity's functional currency).

The Group estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates (such as the entity's stand-alone credit rating).

### 4 STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE

Standards and interpretations issued but not yet effective up to the date of issuance of the Group's consolidated financial statements are disclosed below. The Group intends to adopt these standards when they become effective:

- *Amendments to IAS 21 – Lack of exchangeability: In August 2023, the IASB issued these amendments to IAS 21 to specify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking. The amendments will be effective for annual reporting periods beginning on or after 1 January 2025;*
- *Amendments to IFRS 9 and IFRS 7 – Classification and Measurement of Financial Instruments: In May 2024, the IASB issued these amendments which:*
  - i) *Clarify that a financial liability is derecognised on the 'settlement date', i.e., when the related obligation is discharged, cancelled, expires or the liability otherwise qualifies for derecognition. It also introduces an accounting policy option to derecognise financial liabilities that are settled through an electronic payment system before settlement date if certain conditions are met.*
  - ii) *Clarify how to assess the contractual cash flow characteristics of financial assets that include environmental, social and governance (ESG)-linked features and other similar contingent features.*
  - iii) *Clarify the treatment of non-recourse assets and contractually linked instruments.*
  - iv) *Require additional disclosures in IFRS 7 for financial assets and liabilities with contractual terms that refer a contingent event (including those that are ESG-linked), and equity instruments classified at fair value through other comprehensive income.*

**4 STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE (continued)**

*The amendments will be effective for annual reporting periods beginning on or after 1 January 2026;*

- *IFRS 18 – Presentation and Disclosure in Financial Statements: In April 2024, the IASB issued this standard which replaces IAS 1 Presentation of Financial Statements. IFRS 18 introduces new categories and subtotals in the statement of profit or loss. It also requires disclosure of management-defined performance measures (as defined) and includes new requirements for the location, aggregation and disaggregation of financial information. The standard will be effective for annual reporting periods beginning on or after 1 January 2027;*
- *IFRS 19 – Subsidiaries without Public Accountability – Disclosures: In May 2024, the IASB issued this standard which allows eligible entities to elect to apply reduced disclosure requirements while still applying the recognition, measurement and presentation requirements in other IFRSs. Unless otherwise specified, eligible entities that elect to apply IFRS 19 will not need to apply the disclosure requirements in other IFRSs. The standard will be effective for annual reporting periods beginning on or after 1 January 2027; and*
- *Amendments to IFRS 10 and IAS 28 – Sale or Contribution of Assets between an Investor and its Associate or Joint Venture: In December 2015, the IASB issued these amendments which clarify that a full gain or loss is recognised when a transfer to an associate or joint venture involves a business as defined in IFRS 3 Business Combinations. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognised only to the extent of unrelated investors' interests in the associate or joint venture. The effective date for adoption of these amendments has deferred indefinitely.*

The Group's management is currently assessing the impact of above mentioned new and amended standards and interpretations on Group's consolidated financial statements.

At 31 December 2024

**7 INVESTMENT INCOME**

	<b>2024</b>	2023
	<b>BD</b>	BD
Dividend income	<b>1,133,863</b>	1,165,300
Interest income	<b>136,923</b>	128,724
	<b><u>1,270,786</u></b>	<u>1,294,024</u>

**8 EARNINGS PER SHARE**

The basic earnings per share is calculated by dividing the profit for the year attributable to the shareholders of Trafco Group B.S.C. by the weighted average number of shares outstanding during the year, excluding the weighted average number of shares repurchased by the Company and held as treasury shares.

The following reflects the income and share data used in the basic and diluted earnings per share computations:

	<b>2024</b>	2023
Profit for the year attributable to the shareholders of Trafco – BD	<b><u>1,827,333</u></b>	<u>1,752,114</u>
Weighted average number of shares, net of treasury shares	<b><u>74,197,575</u></b>	<u>74,197,575</u>
Basic and diluted earnings per share (fils)	<b><u>25</u></b>	<u>24</u>

Basic and diluted earnings per share are the same as the Company has not issued any instruments that would have a dilutive effect.

There have been no other transactions involving ordinary or potential ordinary shares between the reporting date and the date of issue of these consolidated financial statements, that would have a dilutive effect.

**9 BOOK VALUE AND FAIR VALUE PER SHARE**

Bank overdrafts are denominated in Bahraini Dinars and United States Dollars and carry interest at commercial rates.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2024

**16 CASH AND CASH EQUIVALENTS (continued)**

Bank balances include short term deposit of BD 880,000 (2023: BD 3,173,164) with an average effective profit rate of 6.75% (2023: 4.9%) and has an original maturity of twelve months.

The Group has BD 16,790,070 (2023: BD 16,862,218) of undrawn borrowing facilities as at 31 December 2024.

**17 SHARE CAPITAL AND RESERVES****a) Share capital**

	<b>2024</b>	<b>2023</b>
	<b>BD</b>	<b>BD</b>
Authorised:		
100,000,000 (2023: 100,000,000) shares of BD 0.100 each	<b>10,000,000</b>	10,000,000
Issued, subscribed and fully paid-up:		
80,675,050 (2023: 80,675,050) shares of BD 0.100 each	<b>8,067,505</b>	8,067,505

**b) Treasury shares**

Treasury shares represent 6,477,475 (2023: 6,477,475) shares amounting to BD 1,706,644 (2023: BD 1,706,644), representing 8.03% (2023: 8.03%) of the issued share capital, held by the Company.

**c) Share premium**

The share premium has arisen on the issue of shares in 2000 and rights shares issued in 2008 and is not available for distribution, but can be utilised as stipulated in the Bahrain Commercial Companies Law.

**d) Statutory reserve**

As required by the Bahrain Commercial Companies Law and the Company's articles of association, 10% of the profit for the year is to be transferred to statutory reserve every year. The Company may resolve to discontinue such annual transfers when the reserve totals 50% of the issued and paid-up share capital. In 2020, the shareholders resolved to discontinue further transfer of profit to statutory reserve as the reserve equaled 50% of the paid-up capital of the Company.

The reserve cannot be utilised for the purpose of distribution except in such circumstances as stipulated in the Bahrain Commercial Companies Law.

**e) General reserve**

The general reserve has been made in accordance with the articles of association of the Company. The Company may resolve to discontinue such annual transfers, when deemed appropriate. There are no restrictions on the distribution of this reserve. During the year, the Company transferred BD 50,000 (2023: BD 50,000) to the general reserve.

**f) Fair value reserve**

This reserve relates to fair value changes of investments at fair value through other comprehensive income.

**g) Foreign currency reserve**

The foreign currency reserve is used to recognise exchange differences arising from the translation of the financial statements of foreign operations.

**h) Retained earnings - non-distributable**

This represents Group's share in the statutory reserves of its subsidiaries and is not available for distribution.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2024

**18 DIVIDENDS PAID AND PROPOSED**

At the annual general meeting of the shareholders held on 27 March 2024, a final cash dividend of 17 fils per share, excluding treasury shares, totaling BD 1,261,223 for the year ended 31 December 2023 was declared and paid (2023: At the annual general meeting of the shareholders held on 29 March 2023, a final cash dividend of 15 fils per share, excluding treasury shares, totaling BD 1,112,844 for the year ended 31 December 2022 was declared and paid).

A cash dividend of 18 fils per share, excluding treasury shares, totaling BD 1,335,413 (2023: a cash dividend of 17 fils per share, excluding treasury shares, totaling BD 1,261,223) has been proposed by Board of Directors and will be submitted for formal approval of shareholders at the Annual General Meeting.

**19 LEASE LIABILITIES**

Lease liabilities relate to the Group's leases for land, buildings and motor vehicles. The movements in the lease liabilities during the year, were as follows:

	<b>2024</b>	<b>2023</b>
	<b>BD</b>	<b>BD</b>
At 1 January	<b>3,481,687</b>	3,934,849
Remeasurement of lease liabilities	<b>102,209</b>	(147,959)
Additions/Renewals	<b>490,265</b>	47,608
Termination of lease	<b>(42,376)</b>	(18,594)
Interest expense for the year	<b>206,909</b>	191,968
Payments during the year	<b>(566,328)</b>	(526,185)
At 31 December	<b>3,672,366</b>	3,481,687
Non-current	<b>3,132,699</b>	3,009,350
Current	<b>539,667</b>	472,337
	<b>3,672,366</b>	3,481,687

The following are the amounts recognised in consolidated statement of profit or loss in respect of leases:

	<b>2024</b>	<b>2023</b>
	<b>BD</b>	<b>BD</b>
Depreciation expense on right-of-use assets (note 11)	<b>429,357</b>	410,944

Gain on termination of lease	<b>(257)</b>	(107)
<b>Total amount recognised in profit or loss</b>	<b>636,009</b>	602,805

The Group had total cash outflows for leases of BD 566,328 in 2024 (2023: BD 526,185). The Group also had non-cash additions to right-of-use assets and lease liabilities of BD 490,265 (2023: BD 47,608).

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2024

**20 EMPLOYEES' END OF SERVICE BENEFITS**

Movements in the employees' end of service benefits are as follows:

	<b>2024</b>	<b>2023</b>
	<b>BD</b>	<b>BD</b>
At 1 January	<b>1,550,553</b>	1,531,760
Provided during the year (note 6)	<b>244,767</b>	235,196
Paid to employees	<b>(100,264)</b>	(216,403)
Paid to Social Insurance Organization	<b>(105,470)</b>	-
At 31 December	<b>1,589,586</b>	1,550,553

Effective 1 March 2024, pursuant to Edict number 109 of 2023 issued by His Royal Highness the Prime Minister of the Kingdom of Bahrain, certain portion of the end of service benefits' liability has been transferred to the Social Insurance Organization (SIO), representing the amounts paid by the Company to the SIO on a monthly basis starting March 2024. Such portion of liability would be settled directly by SIO when the relevant employees leave the Company.

**21 GOVERNMENT GRANT**

Government grant represents amount received from The Labour Fund (Tamkeen) for purchase of plant and equipment. The amount is amortised over 15 years which is equivalent to the estimated useful life of the plant and equipment. Movement in government grant will be presented as follows:

	<b>2024</b>	<b>2023</b>
	<b>BD</b>	<b>BD</b>
At 1 January	<b>40,965</b>	44,632
Received during the year (i)	<b>100,000</b>	-
Recognised in consolidated statement of profit or loss and other comprehensive income	<b>(3,667)</b>	(3,667)
At 31 December	<b>137,298</b>	40,965
Non-current	<b>126,964</b>	37,298
Current	<b>10,334</b>	3,667
	<b>137,298</b>	40,965

- (i) This pertains to the amount received by Group during the year for construction of cold room storage project, which is currently being capitalised under capital work in progress. The completion of this project is anticipated in next year. The grant will be amortized over the useful life of the asset, starting from the date the asset becomes available for use.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2024

**22 TERM LOANS**

		<i>Interest rate</i>	<i>Maturity</i>	<b>2024 BD</b>	<b>2023 BD</b>
a)	Loan from Bahrain Islamic Bank B.S.C.	6.25% p.a.	September 2025	<b>64,547</b>	146,216
	Loan from Bahrain Islamic Bank B.S.C.	6.25% p.a.	September 2025	<b>75,854</b>	171,593
	Loan from Bahrain Islamic Bank B.S.C.	6.25% p.a.	March 2025	<b>10,917</b>	52,975
	Loan from Bahrain Islamic Bank B.S.C. (i)	6.25% p.a.	March 2029	<b>982,873</b>	1,167,242
b)	Loan from Habib Bank Limited (ii)	One-month BIBOR plus 1.3% p.a.	December 2028	<b>1,258,333</b>	500,000
c)	Loan from Ahli United Bank B.S.C.	Three-month BIBOR plus 3% p.a.	March 2024	-	6,416
d)	Loan from Arab Bank (iii)	One-month BIBOR plus 1.75% p.a.	March 2027	<b>834,678</b>	1,168,543
				<b>3,227,202</b>	<b>3,212,985</b>

The term loans are presented in the consolidated statement of financial position as follows:

	<b>2024 BD</b>	<b>2023 BD</b>
Non-current	<b>2,246,737</b>	2,369,475
Current	<b>980,465</b>	843,510
	<b>3,227,202</b>	<b>3,212,985</b>

Loan instalments payable within twelve months from the reporting date are disclosed as current portion and remaining are disclosed as non-current. These loans are secured by promissory notes issued by the Group.

The terms of the loan agreements require compliance with certain covenants relating to financial ratios and the declaration of dividends to shareholders and the group has no indication that it will have difficulty complying with those covenants.

- i) This represents loan obtained for construction of new cold room storage project. The loan is unsecured and carries interest at the rate of 6.25% p.a. The loan has a term of 72 months and repayment started from May 2023 in 24 quarterly installments.
- ii) This represents a loan to finance the construction of new cold room storage project. The loan is unsecured and carries an interest of 1 month BIBOR plus 1.3%. The loan has a term of 60 months and repayment started from January 2024 in 60 monthly installments. The rate used to determine the amount of borrowing costs eligible for capitalisation was 7.25% which is the Effective Interest Rate (EIR) of the specific borrowing.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2024

**22 TERM LOANS (continued)**

- iii) This represents a loan obtained for acquisition of Mawashi Trading Company W.L.L. The loan is unsecured and carries interest at the rate of 1 month BIBOR plus 1.75%. The loan has a term of 59 months and repayment of loan started from July 2022 in 59 monthly equal instalments.

**23 TRADE AND OTHER PAYABLES**

	<b>2024</b>	<b>2023</b>
	<b>BD</b>	<b>BD</b>
Trade payables	<b>4,188,044</b>	5,320,646
Accrued expenses	<b>1,687,541</b>	1,790,701
Advances from customers	<b>150,332</b>	95,973
Other payables	<b>690,905</b>	681,186

**27 COMMITMENTS AND CONTINGENCIES**

**(a) Capital expenditure commitments**

Estimated capital expenditure contracted for at the reporting date but not provided for amounted to BD 387,538 (2023: BD 1,753,376) and expected to be settled within one year.

**(b) Guarantees:**

Tender, advance payment and performance guarantees issued by banks on behalf of the Group, in the normal course of business, amounted to BD 955,174 as at 31 December 2024 (2023: BD 832,627).

**28 FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES**

**Introduction**

The Group's financial liabilities comprises of term loans, import loans, lease liabilities, retention payable, a portion of trade and other payables and bank overdrafts. The main purpose of these financial liabilities is to raise finance for the Group's operations and capital expenditure. The Group has trade and other receivables and bank balances and cash that arise directly from its operations. The Group also holds Investments at fair value through other comprehensive income.

The Group is exposed to market risk, credit risk and liquidity risk.

*Board of Directors*

The Board of Directors is responsible for the overall risk management approach and for approving the risk strategies and principles.

*Executive Committee Board*

The Executive Committee is responsible for evaluating and approving business and risk strategies, plans and policies of the Group and market and liquidity risks pertaining to the Group's investment activities by optimising liquidity and maximising returns from the funds available to the Group.

At 31 December 2024

**28 FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (continued)****Market risk**

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises of interest rate risk, foreign currency risk and equity price risk. Financial instruments affected by market risk include investments at fair value through other comprehensive income, a portion of trade and other receivables, term loans, a portion of trade and other payables, lease liabilities and bank overdrafts.

The sensitivity analysis have been prepared on the basis that the amount of net debt, the ratio of fixed to floating interest rates of the debt and the proportion of financial instruments in foreign currencies are all constant at 31 December 2024 and 31 December 2023.

The following assumptions have been made in calculating the sensitivity analysis:

- The consolidated statement of financial position sensitivity relates to financial assets and financial liabilities as at 31 December 2024 and 31 December 2023;
- The sensitivity of the relevant profit or loss item is the effect of the assumed changes in respective market risks. This is based on the financial assets and financial liabilities held at 31 December 2024 and 31 December 2023; and
- The sensitivity of equity is calculated by considering the effect of investments at fair value through other comprehensive income and translation of foreign operations at 31 December 2024 and 31 December 2023 for the effects of the assumed changes of the underlying risk.

*Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in interest rates. The Group is exposed to interest rate risk on its floating interest rate bearing liabilities (bank overdrafts and certain term loans).

The following table demonstrates the sensitivity of profit or loss to reasonably possible changes in interest rates, with all other variables held constant. The Group's profit for the year is affected through the impact on floating interest rates bearing bank overdrafts and certain term loans, as follows:

	<b>2024</b>		<b>2023</b>	
Increase (decrease) in basis points	<b>+50</b>	<b>-50</b>	+50	-50
(Decrease) increase in profit [in BD]	<b>(30,718)</b>	<b>30,718</b>	(27,570)	27,570

*Foreign currency risk*

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Group's exposure to the risk of changes in foreign exchange rates relates primarily to the Group's operating activities (when revenue or expense is denominated in a different currency from the Group's functional currency).

The following table demonstrates the sensitivity to a reasonably possible change in the foreign currency exchange rate, with all other variables held constant, of the Group's profit or loss (due to changes in the fair value of monetary assets and liabilities) and the Group's other comprehensive income (due to changes in the net investment in a foreign operations). As the Bahraini Dinar is pegged to the United States (US) Dollar, balances in US Dollars and currencies pegged to the US Dollar are not considered to represent a significant foreign currency risk.

At 31 December 2024

**28 FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (continued)****Market risk (continued)***Foreign currency risk (continued)*

	<b>Change in exchange rate</b>	<b>Effect on profit</b>		<b>Effect on other comprehensive income</b>	
		<b>2024</b>	<b>2023</b>	<b>2024</b>	<b>2023</b>
		<b>BD</b>	<b>BD</b>	<b>BD</b>	<b>BD</b>
Euro	+5%	<b>2,965</b>	653	-	-
Other currencies	+5%	<b>245</b>	599	-	-
Kuwaiti Dinar	+5%	-	-	<b>13,843</b>	18,012

A similar decrease in foreign exchange rates would have an equal and opposite impact on the Group's profit and other comprehensive income as disclosed above.

*Equity price risk*

Equity price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual investment or its issuer, or factors affecting all investments traded in the market.

The Group manages equity price risk through diversification and placing limits on individual and total equity investments. Reports on the investment portfolio are submitted to the Executive Committee on a regular basis. The Executive Committee reviews and approves all investment decisions.

Management's best estimate of the effect on other comprehensive income for the year due to a 5% change in fair value of investments at fair value through other comprehensive income, with all other variables held constant, would be BD 711,075 (2023: BD 798,038).

**Credit risk**

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities (primarily for trade receivables) and from its financing activities, including bank balances and other financial instruments.

*Trade and other receivables*

Customer credit risk is managed by each entity as per Group's established policy, procedures and control relating to customer credit risk management. Outstanding customer receivables are regularly monitored. An impairment analysis is performed at each reporting date using a provision matrix to measure expected credit losses. The provision rates are based on days past due for groupings of various customer segments with similar loss patterns (i.e., by customer type) excluding the receivables from the government entities. The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions.

*Bank balances*

The Group limits credit risk on bank balances by dealing only with reputable banks.

*Credit risk concentration*

The Group evaluates the concentration of risk with respect to trade receivables as low, as its customers are located in several jurisdictions and industries and operate in largely independent markets.

The Group sells its products to a large number of wholesalers and retailers. Its five largest customers account for 31% of the outstanding trade receivables at 31 December 2024 (2023: 31%).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2024

28 FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (continued)

**Credit risk (continued)**

*Maximum exposure to credit risk*

The table below shows the maximum exposure to credit risk for the components of the consolidated statement of financial position headings without taking account of any collateral and other credit enhancements.

	<b>2024</b>	2023
	<b>BD</b>	BD
Trade receivables (note 15)	<b>10,292,812</b>	9,078,970
Bank balances (note 16)	<b>1,633,255</b>	5,277,878

Deposits (note 15)	<b>49,304</b>	49,997
	<b>12,166,181</b>	14,710,552

**Liquidity risk**

Liquidity risk is the risk that an enterprise will have difficulties in meeting its commitments. The Group limits its liquidity risk by ensuring bank facilities are available. The Group's terms of sale require amounts to be paid within 60 to 90 days of the date of sale. Trade payables are also normally settled within 60 to 90 days of the date of purchase/shipment.

The table below summarises the maturities of the Group's financial liabilities at 31 December, based on undiscounted contractual payment dates and current market interest rates.

	<b>On demand BD</b>	<b>Less than 3 months BD</b>	<b>3 to 12 months BD</b>	<b>1 to 5 years BD</b>	<b>More than 5 years BD</b>	<b>Total BD</b>

**Capital management**

The primary objective of the Group's capital management is to ensure that it maintains a healthy capital base in order to support its business and maximise shareholders' value.

The Group manages its capital structure and makes adjustments to it in light of changes in business conditions. In order to maintain or adjust the capital structure, the Company may adjust the dividends paid to shareholders, repurchase of own shares, or issue new shares.

No changes were made in the objectives, policies or processes during the years ended 31 December 2024 and 31 December 2023.

The Group monitors capital on the basis of the debt-to-equity ratio. This ratio is calculated as net debt divided by equity. Net debt includes term loans, lease liabilities, contract and refund liabilities, retention payable, trade and other payables, import loans and net of cash and cash equivalents. Equity comprises all components of equity (i.e. share capital, treasury shares, share premium, statutory reserve, general reserve, fair value reserve, foreign currency reserve, retained earnings - non-distributable, retained earnings-distributable and proposed appropriations).

**29 FAIR VALUE MEASUREMENTS**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

*Fair value of financial instruments*

Financial instruments of the Group comprise of financial assets and financial liabilities.

Financial assets consist of investments at fair value through other comprehensive income, trade and other receivables and cash and bank balances. Financial liabilities consist of term loans, import loans, lease liabilities, retentions payable, trade and other payables and bank overdrafts. Fair value of financial instruments is estimated based on the following methods and assumptions:

- a) Bank balances and cash, bank overdrafts, import loans, trade and other receivables and trade and other payables approximate their carrying amounts largely due to the short-term maturities of these instruments as at 31 December 2024 and 31 December 2023;
- b) Term loans and lease liabilities are evaluated by the Group based on parameters such as interest rates. The carrying amounts are not materially different from their fair values as at 31 December 2024 and 31 December 2023; and
- c) Fair value of quoted equity investments is derived from quoted market prices in active markets or in the case of unquoted investments at fair value through other comprehensive income using market multiples or other appropriate valuation methodologies.

*Fair value of non-financial assets or liabilities*

The Group does not have any non-financial assets or liabilities which have been measured at fair value as at 31 December 2024 and 31 December 2023.

*Fair value hierarchy*

For fair value hierarchy of the Group's assets and liabilities measured at fair value refer to note 13.

**30 SEGMENT REPORTING**

For management purposes, the Group is organised into business units based on their products and services and has six reportable operating segments as follows:

Wholesale operations	Import and distribution of foodstuff
Investments	Investment in quoted and unquoted securities.
Dairy products and beverages	Production, processing and distribution of dairy products, juices, ice-cream, bottling of water and other items.
Fruits and vegetables	Import and distribution of fruits, vegetables and other food items.
Storage and logistics	Providing storage and logistics services.
Livestock	Import and sale of live animals, fresh, chilled and frozen meat and food service products.

No operating segments have been aggregated to form the above reportable operating segments.

Management monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profit or loss which in certain respects, as explained later in a table, is measured differently from operating profit or loss in the consolidated financial statements.

Transfer prices between operating segments are approved by Group's management.

The Group's geographical segments are based on the location of the Group's assets. Sales to external customers disclosed in geographical segments are based on the geographical location of its customers.

Segment assets include all operating assets used by a segment and consist primarily of property, plant and equipment, inventories, right of return assets, trade and other receivables and bank balances and cash. Whilst the majority of the assets can be directly attributed to individual business segments, the carrying amounts of certain assets used jointly by two or more segments are allocated to the segments on a reasonable basis.

Segment liabilities include all operating liabilities used by a segment and consist primarily of employees' end of service benefits, term loans, import loans, bank overdrafts, contract and refund liabilities and trade and other payables. Whilst the majority of the liabilities can be directly attributed to individual business segments, the carrying amounts of certain liabilities used jointly by two or more segments are allocated to the segments on a reasonable basis.

Revenue from operations for the year ended 31 December 2024 in the State of Kuwait and Kingdom of Saudi Arabia amounted to BD 5,555,763 (2023: BD 5,657,546) and profit for the year ended 31 December 2024 amounted to BD 122,709 (2023: BD 249,848). All remaining revenue and profit for the year is generated from the primary geographical segment in the Kingdom of Bahrain.

Total assets in the State of Kuwait and Kingdom of Saudi Arabia amounted to BD 2,278,306 (2023: BD 2,394,586) and total liabilities amounted to BD 2,144,866 (2023: BD 2,261,144). All remaining assets and liabilities arise from the primary geographical segment in the Kingdom of Bahrain.

Inter-segment revenues, transactions, assets and liabilities are eliminated upon consolidation and reflected in the "Adjustments and eliminations" column.
